

Certificates/Standards

- ISO 9001
- PED D, H, H1
- SQL
- BPE
- NORSOK
- Achilles JQS
- ASME U, U2 & R
- EN3834-2
- CRN
- MID

Design codes

- EN-13445
- API-560, 620, 650
- ASME SEC. VIII Div. 1,2
- PD-5500
- RToD [Stoomwezen]
- EN 14015
- AD2000
- CODAP
- KIWA

Advantages

- No additional cooling
- Space saver; one tank equals fifty kegs
- Time saver; no keg connecting or precooling
- No CO₂ needed
- Plug and play
- The freshest beer possible

Logistics & events

There are many different ways to transport cold fresh beer to a venue. In a simple insulated tank or in a unit with components, such as:

- beer hose
- cooler and compressor
- flowmeter, beer counter and printer
- CO₂ unit

Whichever option you choose, all parts are from renowned companies, available worldwide. Many of the items used by FIB can be reused in your new delivery unit. It saves you a lot of money.

FIB Industries is experienced in providing equipment for events. All tanks are insulated and can be equipped with a cooling system and compressor. Plug into the grid, connect the tap and the cold fresh beer is ready to be served. The event tank saves both time and money. Precool the beer and change the kegs is no longer needed. Tapping loss is close to zero; one 1000-liter tank equals twenty 50-liter kegs.

Event bar

- An eventbar on wheels with a 500L insulated tank and a 20L keg for special beers.
- Beer, tank, keg with CO₂ bottle, cooler, compressor, drip tray and 2 fonts in one unit.

Flexibility

FIB Industries, the inventor of tankbeer, has seen it all. From local events up to major concerts. Motto: "Keep it simple, cut logistic cost and tapping loss and have a cold fresh beer in no time."

Demand

A solution for events or speed delivery. A small trailer with tank, cooler and compressor. One tap or more? Or maybe a canopy? All you need is a towbar.

OVERVIEW BEER DELIVERY SYSTEMS

Number of tank beer clients	Delivery system	Volume	
5	Single tank in frame	1.000L	
10	Skid (with insulated tanks)	1.000L+	
50	Chilled delivery unit small	3.000L+	
100	Chilled delivery unit large	5.000L+	
100	Trailer	10.000L+	
>100	Beer truck*	8.000L+	

* Beer trucks are available with multi compartments, CO₂ bottles and CO₂ control.
